For the collection of data for a 3D Energy Efficiency Project on behalf of Sustainable Energy West and Naomh Breandain Credit Union Ltd

Sustainable Energy West is a small group of voluntary people set up in 2019 to create awareness of energy usage for the town of Loughrea. It has completed an Energy Master Plan and 11 Energy Audits for community buildings and businesses in the town and common bond of the credit union. Its aim at present is to convert the energy data contained in the EMP together with new energy data about to be collected and showcase this on a 3D model. Naomh Breandain Credit Union, Loughrea and SEW supports this project as joint controllers both financially and through manpower as three committee members of SEW are also members of the credit union.

The 3D project we are about to carry out involves the gathering of information from the residential households and businesses in the town of Loughrea. The type of information to be collected includes categories like Building Information, Fossil Fuels Types, Electricity, Renewables, Building Retrofit and Motoring.

The information we collect will be used for the purpose of the 3D project only. It will not be used for any other purpose.

Should anyone have any queries in relation to this project, please send an email to: info@naomhbreandancu.ie (or) sew@sustainableenergywest.ie
